

# Hidding Hot Link Pro Eye

Hot Link Pro's super sensitive IR Eye can be mounted almost anywhere in a hidden location. The Eye only needs to see the room the remote is in and does *not* have to be in direct line of site. Mount the Eye behind a speaker grill, cabinet, door slot, plasma or LCD TV or under a toe-kick or on top of a cabinet. Have a wall plate with another device? just mount the Eye behind the wall plate. The IR signals will pass through and remotes will work up to 25 feet away. A bezel is available for outdoor and wet locations like pool houses and hot tubs.

Eye mounted on top of cabinet  
out of site from below

Eye under toe-kick

Eye mounted under sub woofer

Eye behind LCD TV  
Eye is facing back wall

Eye in door slot

Eye behind speaker grill and out of site

Eye mounted behind wall plate

Sees IR signals through the plate!

Eye mounted with Bezel
